

Truma VarioHeat eco

For vans and caravans

-  Powerful caravan heater with two output levels
-  Automatic regulation of the heating output depending on the set temperature
-  Lightweight, requires little space
-  Even heat distribution in the vehicle via air outlets
-  Exact setting of the required room temperature
-  High air throughput for very quick heating

More details about the Truma VarioHeat eco

VarioHeat is an especially compact heater for caravans, motor homes and campervans. It can be installed flexibly in various positions – vertically or horizontally – and is suitable as the main heater in a van or an additional heater in larger vehicles.

High-performance, compact gas heater of the latest generation. Suitable for small campervans, motorhomes and caravans.

The Truma VarioHeat eco is an extremely compact and lightweight gas heater of the latest generation. It is very powerful and heats your vehicle to the required temperature very quickly. Thanks to the various functions, you can always set the heater to your precise requirements.

If you want the vehicle to heat up quickly, you can use the boost function. You can select the night mode on the Truma VarioHeat eco to operate the heater at the lowest level in its 1300 Watt mode so you can sleep.

Not only can you use the digital Truma CP plus control panel to operate the heater; you can also control it via an installed Truma air conditioning system.

Specifications

Energy sources:	LPG
Operating pressure:	30 mbar
Rated heat output:	1300w / 2800w
Fuel consumption:	100g/h / 220g/h
Power supply:	12v
Power consumption:	0.65A / 2.75A
Weight:	approx. 5.5kg
Dimensions:	400 x 284 x 123mm (L x W x H)
Air flow rate (free-blowing):	75m ³ /h/ 155m ³ /h
Quiescent current consumption CP:	4 mA
