Prod.nr. 309852 - 309851  
VW901-04

## THULE OMNISTOR WARRANTY

1. The warranty for the Thule Omnistor awning to the original buyer is two years from date of invoice.
2. The warranty covers replacement of parts arising from defects and from the inability of the awning to perform its intended function.
3. In case of a defect, consult your dealer with original invoice.
4. Defects, which in our judgment occur from misuse, negligence or accident, are not covered by the warranty. In addition, the warranty does not apply if the product is installed or handled improperly or if the awning has been altered in any way or has been repaired by unqualified persons, or if the serial number and/or date has been altered or removed.
5. Should the original buyer wish to return to us parts believed to be defective, the parts should be sent prepaid. If we find the parts defective and covered by warranty, they will be repaired and returned. If warranty does not apply or has expired, a nominal charge will be made. Any transport costs are for the owner's account.
6. Returned goods should be in solid wrapping.
7. No other warranty is given and no representative is authorised to give any warranty or assume liability by words or action under any warranty other than that is contained herein. This warranty is expressly in lieu of any other expressed or implied warranty of whatever nature and expressly excludes any other further liability.

OPTION : OMNI-GUTTER multipurpose rain gutter Art.nr. 3079\*\*

2. Maximal 0,5m auskurbeln (Fig.7 und 10). Dann die Stützfüße aus dem Frontprofil herausnehmen(Fig.8), die Stützfüße bis auf die gewünschte Höhe ausschieben(Fig.9) und weiter auskurbeln. Bemerkung: Die Stützfüße nie so hoch ausschieben, dass das Tuch zwischen der Oberkante der Arme und dem Kasten klemmt.
3. Klemmen Sie die Stützarme fest (Fig.9).
4. Die Kurbel etwas zurückdrehen, bis das Tuch gespannt ist.
5. Bei Regen und Wind: Stellen Sie einen Stützfuß bedeutend tiefer (Fig.11), als den anderen, so daß das Wasser leichter vom Tuch abfließen kann. Befestigen Sie die Stützfüße mit Heringen im Boden (Fig.12). und montieren Sie ein Sturmband: Bestellnr. 50 0000 38 (Fig.11).
6. Das Tuch darf nicht für längere Zeit naß aufgerollt werden.
7. Das Tuch nur mit Wasser oder mit OMNI-CLEANER reinigen.

Read these instructions carefully. No guarantee will be allowed for wrong installation.

## Contents installation kit:

|                                      |   |
|--------------------------------------|---|
| A. Duo bolt plate.....               | 3 |
| B. Wood bolts DIN603 - M6x16.....    | 4 |
| C. Security nuts DIN985.....         | 4 |
| D. Screw caps M6.....                | 4 |
| E. Hexagon bolts DIN933 - M6x20..... | 2 |
| F. Nylon washer .....                | 2 |
| G. Adapter 120mm.....                | 1 |
| H. Adapter 216mm.....                | 1 |

## Installation

1. Slide the duo bolt plates with the wood bolts in the correct order into the roof rail on the passenger's side (fig.1) to the position as shown (fig.2).
2. Apply SIKA 252 glue on the ribbed surfaces (fig.3). Remove the grease from the roof with SIKA activator.
3. Put the adapters in place (fig.2), tighten with the nuts and position the screw caps.
4. Hook the awning onto the adapters (fig.4), close all the doors, and rotate the awning outwards for 30cm (fig.6 en 7).
5. Slide the awning until the hole in the awning is in accordance with the nut on the first adapter. Tighten using the bolt and the nylon washer (fig.5).
6. Slide the support arms out of the front profile (fig.8) and adjust them to the required height (fig.9). Unroll the awning until the second bolt can be positioned.
7. Whilst the glue is drying, leave the awning open for  $\pm 5$ cm in order not to torsion the adapters against each other.

## General remarks:

- An awning is a sun and not a rain protection. The awning should be closed in case of storm, snow or heavy rainfall.
- The awning cannot be used without putting out the support arms.

## Users instructions:

1. Close all the doors. Introduce the crank arm into the bayonet joint (fig.6) and unroll the awning while keeping the crank down (fig.7).
2. Unroll till 0,5 m max. (fig.10). Slide the support arms out of the front profile (fig.8) and adjust them to the required height (fig.9) before further unrolling. Remark : Never put out the support arms too high, so that the fabric jams between the arms and the box.
3. Fasten the support arms (fig.9).
4. After completely unrolling, the fabric can be tensioned by winding back a little.
5. In rainy or windy conditions: Lower one side of the awning in such a way that the water can run down the fabric (fig.11). Fix the support arms with pegs to the ground (fig.12) and install the hold down kit: Order nr. 50 0000 38 (fig.11).
6. The fabric should not be re-wound and stored when wet for a long period.
7. Clean the fabric only with water or OMNI-CLEANER.
